Free Software Chamber of Commerce

NETWORK MEETINGS

USING FREE SOFTWARE IN YOUR BUSINESS

NETWORK MEMBERS AREA

Business Opportunity

NYLXS's Free Software Chamber of Commerce is the first place for Businesses and Consultants to come together, network and discover the exiting opportunity in deploying Free Software in Business and Enterprise.

Our Business Network provides three basic functions for the NYC Business Community:

First - We provide one stop shopping for small and large businesses to find the IT support it needs to enable their businesse without being coerced into forced contracts and licenses. Buy once, use to your hearts delight, that's the promise of Free Software to your business. And pay for support when needed. This should be the first place to find qualified help with your business information infrastructure needs.

Second - Our network of consultants will join forces together to deliver a broad range of business needs, by working together, and sharing the marketing, and promotions costs needed to get services to the public. In addition, consultants in our network need never feel alone. The entire network is at your disposal for sub-contracting and advice. It's the Free Software way.

Third - We have created a network for IT professionals to get together and discuss, face to face our needs for clients and share efforts to fill orders, and promote new sales. This network is not only for IT Professionals, but also businesses using Free Software and who need get work done, to get estimates for costs, and to work out contracts.

It's Free Software like in Free Enterprise
