

Free Software Institute

About Us

The **Free Software Institute** of the **New York Linux Scene** is proud to announce the next step in the Gnu/Linux Revolution: Affordable Free Software training now. Staffed by volunteers, we provide a complete cradle-to-grave Linux and Free Software education program and low costs. Free Software is out there, and its prime-time. You just need to learn how to use it. This is empowerment. This is NYLXS.

Updated class schedules and offerings can be found on our website, and if anything is unclear, or you have questions to answer, feel free to contact Ruben Safir at ruben@nylxs.com

Course Offerings

GNU/Linux_1: Introduction to GNU/Linux

Class Held Weekly, Tuesdays from 7:00pm to 11:00pm

Instructor: Joseph Grastara, NYU System Administrator

Location: NYLXS Education Center

Kings Games, 1724 East 12th Street (Corner of Kings Highway)

Brooklyn, NY 11229

Limited to 20. Our GNU/Linux_1 class introduces Free Software and the GNU/Linux operating system. Through lectures and hands on text and graphical installations, students develop an understanding of the operating system and its historical relevance. We will discuss how information is stored, accessed, and organized, and look at how the system works. Students will learn to perform complete text and graphical installations, as well as basic network and system configuration.

Unix 1

Class Held Weekly, Tuesdays from 7:00pm to 11:00pm

Instructor: Joseph Grastara, NYU System Administrator

Location: NYLXS Education Center

Kings Games, 1724 East 12th Street (Corner of Kings Highway)

Brooklyn, NY 11229

Limited to 20. Our Introduction to Unix 1 class introduces the Command Line Interface (CLI) and the powerful tools it makes available. The CLI is built into every Unix system. It is the strongest and most essential tool to unleash the potential of your computer. This class will demystify the CLI, and help explain how and when to use it to make the most efficient use of your computing experience.

Unix 2 - Shell Scripting and Advanced Unix skills

Class Held Weekly, Thursdays from 7:00pm to 11:00pm

Instructor: Joseph Grastara, NYU System Administrator

Location: NYLXS Education Center

Kings Games, 1724 East 12th Street (Corner of Kings Highway)

Brooklyn, NY 11229

Limited to 20. Learn the Secrets of Unix Shell Scripting, the tool of choice for system initiation installation scripts and much more! Also learn the an introduction to the C programming Language.

The **New York Linux Scene** is staffed by volunteers, working to bring Free Software to the masses. We are working to lower government costs by putting Free Software in governments. We are working to put technology in schools affordably, by bringing Free Software into schools. We are working to save the masses from a technology ignorant government and money hungry industries. We are working to raise computer literacy by offering classes. As such, we are offering these classes for \$500 for a set of two, while classes elsewhere cost thousands of dollars, and we do not profit off of the money.

Course Offerings

Perl_1: Introduction to Programming with Perl

Class Held Weekly, Thursdays from 7:00pm to 11:00pm

Instructor: Ruben Safir

Location: NYLXS Education Center

Kings Games, 1724 East 12th Street (Corner of Kings Highway)

Brooklyn, NY 11229

Limited to 20. Our Introduction to Programming with Perl class is designed to teach proper, real-world programming techniques using Perl. Introducing the core concepts of the language, this class will take you through Perl's underlying structure, and help you see the internal logic of the language. You will learn to write your own programs, and be exposed to working with real programming situations in collaborative environments.

Perl 2: Advanced Web Programming with Perl

Class Held Weekly, Thursdays from 7:00pm to 11:00pm

Instructor: Ruben Safir

Location: NYLXS Education Center

Kings Games, 1724 East 12th Street (Corner of Kings Highway)

Brooklyn, NY 11229

Limited to 20. This class builds on the skills developed in Perl_1 to take your programming to the next level. Beginning with object oriented programming, this session will help you extend what you've learned to further harness the power of the language. Learn to develop more powerful applications and how to use Perl to facilitate dynamic, database-driven web development, maximizing your time and your skill.
